

Characteristics

Ventilation box with double fan to ensure constant air supply: if one fan fails, the other is automatically activated. It has a 5 cm insulation, which makes it the quietest case and includes a non-return air system.

The fan speed is fully adjustable. In addition, its maintenance is very easy thanks to the large door that gives the unit room to manoeuvre.

- Ventilation unit with 50 mm thick of sound insulation
- External rotor motor protected through thermal contact
- Centrifugal double fan with double inlet
- Back draught damper that avoids air re-circulation
- 0-100% variable speed
- Connection box IP54 incorporated
- Wide service door
- Circular connexions to standard ducts

Specifications

Model	Tension (V (50 Hz))	Current fans (A)	Power (W)	Speed (rpm)	Air Flow (m ³ /h)	Maximum Pressure (Pa)
TWINBOX 150	1x230V	0,47	100	1640	375	310
TWINBOX 200	1x230V	0,47	100	1640	375	310
